

# ZAID AFTAB

## DevOps Engineer

Patna, Bihar, India | +91 8639093947 | zadaftab@yahoo.com  
github.com/Zaid1110 | linkedin.com/in/zaidaftab

## PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of hands-on experience building CI/CD pipelines and running containerized workloads on AWS (Jenkins, Docker, Kubernetes/EKS, Terraform, ArgoCD). CCNA-trained networking background from hospital IT infrastructure. Built production-style platforms including an 11-microservice application on EKS with GitOps-based delivery.

## TECHNICAL SKILLS

CI/CD & Automation: Jenkins (multibranch pipelines), GitHub Actions, Git, Nexus, SonarQube, Trivy  
Cloud (AWS): EKS, EC2, S3, VPC, IAM, ECR, ELB, Auto Scaling, CloudWatch, Route 53, Lambda, CloudFormation  
Containers & Orchestration: Docker, Kubernetes (Deployments, Services, Ingress, HPA, ConfigMaps, Secrets), Helm, NGINX Ingress  
Infrastructure as Code: Terraform (modules, remote state, S3 backend), Ansible (playbooks, roles)  
Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch (alarms, dashboards)  
Scripting & Linux: Bash, Python, AWS CLI, Linux (Ubuntu, RHEL, Amazon Linux), systemd, cron  
Networking & Security: TCP/IP, DNS, DHCP, VLANs, Cisco routing and switching (CCNA trained), IAM least privilege, Security Groups

## PROFESSIONAL EXPERIENCE

### DevOps Engineer

Delta 360 Services Pvt Ltd, Noida (Remote) | May 2024 - Present

- Build and maintain Jenkins multibranch CI/CD pipelines taking code from commit to deployment on Amazon EKS.
- Write and maintain Terraform modules for AWS infrastructure provisioning with remote state management.
- Run GitOps-based deployments with ArgoCD across environments.
- Integrate SonarQube quality gates and Trivy container image scanning into delivery pipelines.
- Set up Prometheus and Grafana monitoring with alerting; manage Docker images, Kubernetes workloads, rollbacks and incident troubleshooting with development teams.

### Network Engineer

Mahavir Hitech Hospital Pvt Ltd, Patna | June 2023 - May 2024

- Administered hospital LAN/WAN infrastructure: configured and troubleshot Cisco routers, switches, VLANs, TCP/IP, DNS and DHCP for clinical and administrative users.
- Monitored network performance and resolved connectivity incidents to keep critical hospital systems online.
- Supported end-user systems and enforced network access controls and security policies.

## PROJECTS

### cloudops-microservices-platform [github.com/Zaid1110/cloudops-microservices-platform](https://github.com/Zaid1110/cloudops-microservices-platform)

11-microservice platform on Amazon EKS (Mumbai region) with 12 Jenkins multibranch pipelines, ArgoCD, GitOps, Helm, NGINX Ingress, HPA, Prometheus and Grafana.

### TalentSphere-App [github.com/Zaid1110/TalentSphere-App](https://github.com/Zaid1110/TalentSphere-App)

Full-stack application (Spring Boot, React 19/Vite, MySQL) with end-to-end DevOps pipeline: Jenkins CI/CD, SonarQube, Trivy, Nexus, Docker, EKS deployment with Helm, NGINX Ingress and HPA.

### aws-resource-usage-tracker [github.com/Zaid1110/aws-resource-usage-tracker](https://github.com/Zaid1110/aws-resource-usage-tracker)

AWS CLI and Bash tooling for automated AWS resource usage reporting and cost visibility.

## EDUCATION

B.A. (Honours) English, Magadh University | 2023 | First Class (61.4%)
